Requirements on Housing Conditions in the European Satellites

The attached requirements consist of two parts. Part I requests information of considerable current importance to the research program of I/CI. Part II contains questions of residual importance upon which continual reporting of the latest available information is desired.

In general, information is desired for all satellites. However, information on East Germany, should be given the highest priority, with Bulgaria and Rumania next, because of the paucity of published official data on housing from these countries. For most of the information sought, official census-type statistics are unavailable. What is desired is the best estimate of satellite housing officials. Whenever possible, separate information is desired for urban and for rural areas and for the capital city, as well as for the country as a whole.
